## Description

The IV45 range of twin motor vacuums with 45 litre capacity stainless steel canisters are a tough economical answer to general cleaning needs in a variety of light industrial applications. The Air Vac comprises 2 versions (Wet or Dry and a Type 'H' unit for hazardous dusts). They are ideal for use in areas where electricity is not available or is not allowed. All models have stainless steel drums and are chassis mounted for easy manoeuvrability.

**Both models come complete with a 38 mm tool kit and anti-static hose.**

## Features

- Choice of voltages (IV45) or compressed air driven (AV30)
- ATEX approval on all Air driven units
- Highly manoeuvrable
- Bypass motors for power and reliability
- Huge range of bag and filter options including Type 'H' for hazardous / toxic dusts
- All models come complete with hose and tool kit
- Thermal cutouts fitted for safety
- Price includes 38mm Tool Kit & Hose
